

COSMOKLAR Cream cleaner

APPLICATION

COSMOKLAR cream cleaner is used for the cleaning of PVC-hard, white, and of anodised aluminium, as well as for the cleaning of other smooth surfaces, mainly surfaces made of plastic materials.

COSMOKLAR cream cleaner is used for the window elements in the production- and assembly fields, and particularly for the regular care of already assembled window-, door- and roller shutter profiles.

COSMOKLAR cream cleaner has an intensive but mild cleaning effect and is pH-neutral, gentle to the skin and possesses antibacterial properties.

TECHNICAL DATA

BASIS	surfactant water cleaner with fine dispersed abrasive pigments		
VISCOSITY	Brookfield Sp05/200, +20°C	approx.	850 mPa.s
DENSITY	according to EN 542 at +20°C	approx.	1,42 g/cm ³
PH-VALUE	according to EN 1245 at +20°C	approx.	pH 7,0
MINIMUM TEMPERATURE FOR APPLICATION		from	+5 °C

WORKING INSTRUCTIONS

Agitate **COSMOKLAR cream cleaner** before use!

COSMOKLAR cream cleaner is applied directly from the bottle onto a non-staining slightly humid cloth. The surface is cleaned with a slight friction pressure in the lengthwise direction.

Circular friction movements should principally be avoided during the cleaning!

If the surface is very soiled, the cleaning can be repeated!

After the cleaning, the surface is wiped with a wet cloth.

For stronger soiled surfaces, **COSMOKLAR MR-construction cleaning set** is available.

As non-abrasive cleaning agent, **COSMOKLAR Color** is also at your disposal.

For the cleaning of glass surfaces, you can use **COSMOKLAR Glasrein/glass clean**.

As technical cleaners based on solvents, please refer, for the PVC-window construction, to **COSMOFEN 20** (non-dissolving), **COSMOFEN 10** (slightly dissolving) and **COSMOFEN 5** (strongly dissolving); for the metal construction, you can use **COSMOFEN 60** or **COSMOFEN 70** for baking varnished or anodised profiles.

(Please consider the advices on the corresponding technical data sheet.)

STORAGE

COSMOKLAR cream cleaner can be stored in tightly closed original casks, at a storage temperature between +15°C and +25°C, for at least 12 months.

Agitate before use!

CASK SIZE**500ml PE bottles:**

dispatch units (VE): 24 bottles /box.

Care set "Premium":

1 bottle cleaner (200ml),

1 rubber maintenance stick,

1 bottle special oil for fittings,

1 fleece cloth.

In a small box, suitable for the postal delivery,

dispatch unit: 10 sets

Maintenance set "Basic" (no stock standard):

1 bottle cleaner (200ml),

1 bottle special oil for fittings (30ml).

In a blister packaging, dispatch unit of 12 sets

All casks and bottles are also available, if wished, in a **customer-own design**.

Other cask sizes are available on demand.

CLASSIFICATION

COSMOKLAR cream cleaner is free of phosphates and non-corrosive.

COSMOKLAR cream cleaner is **not** subject to classification, according to the Ordinance on Hazardous Materials (GefStoffV).

Further information for the process can be taken from the safety data sheet, according to 91/155/EEC.

Our instructions for use, processing directives, product- or performance indications, as well as other technical statements are only general guidelines; they only describe the nature of our products (determined value at the production time) and their performance, but they give no guarantee in accordance with paragraph 443 of the BGB (Civil Code). Due to the variety of application purposes for each product, and due to a lot of different particular conditions (e. g. processing parameters, material properties, etc.), the user has to carry out his own individual qualifying tests. Our consultation in application technique, verbal and in writing, as well as with tests, is offered free of charge and is not legally binding.
